Landscaping to Conserve Energy

February 7, 2012—There are many active ways to conserve energy and our resources—installing solar heaters, using CFL bulbs, timers for irrigation systems, just to name a few. But there are ways to accomplish the same goal, and this time using nature as a method. Landscaping can become one of the most effect tools in reducing the cost to cool your home, lowering your water usage and freeing up your time around the house.

This free seminar takes place on Friday February 10th at 3:00pm, in the Commission Chambers at the Deltona City Hall, at 2345 Providence Blvd. Attendees will learn from the experts how landscaping can save them money through conservation. The 3rd Energy Wise seminar—Saving Energy in Your Home—can now be seen on DeltonaTV/Ch. 199 on Bright House Cable. The broadcast schedule can be found on the City's website—www.deltonafl.gov.

Seating is limited, and the public is encouraged to pre-register in person at the Deltona City Hall, the Regional Library or send in their name and contact information to energy@deltonafl.gov. Registrants will receive a coupon redeemable for an energy-efficient light bulb at each seminar they attend. The coupon is good for up to \$10.00 off the purchase of CFL or LED light bulbs.
